Raw rows ingested

100.2m

Rows quarantined (all entities)

325.5k

Silver rows written (4 tables)

147.4m

Gold rows written (2 dims + 2 facts)

147.4m

Bronze → Gold minutes

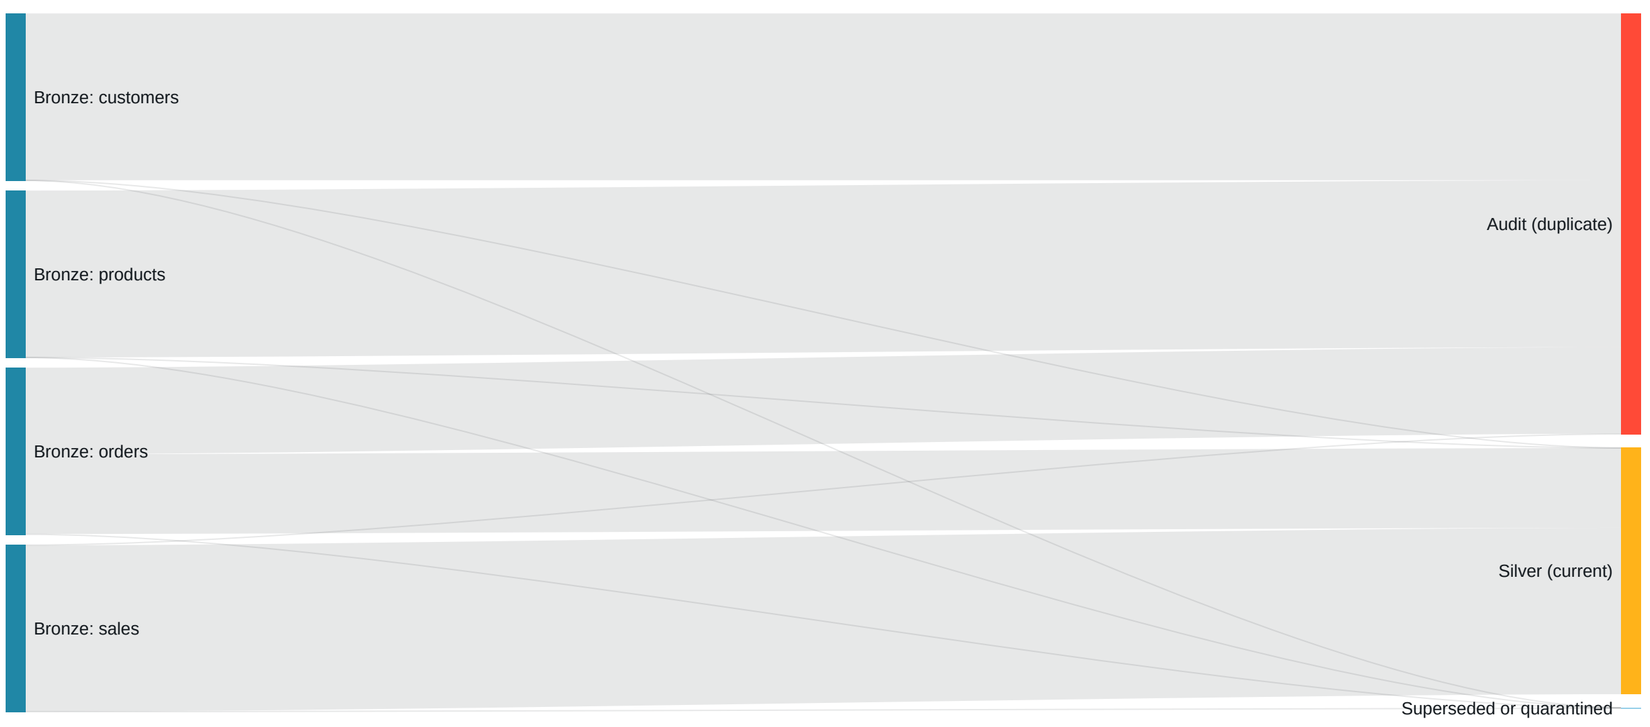

28.5

Data quality checks passed

8 / 8

Where the data goes

Where every Bronze row ended up (reconciled)

How to read this Each entity reads every raw row from Bronze. Silver sends each row to exactly one place:

- **Silver (current):** the live record
- **Superseded:** an older version replaced by a newer one (shown with quarantine)
- **Audit:** an exact duplicate, kept for traceability
- **Quarantine:** failed a validation rule

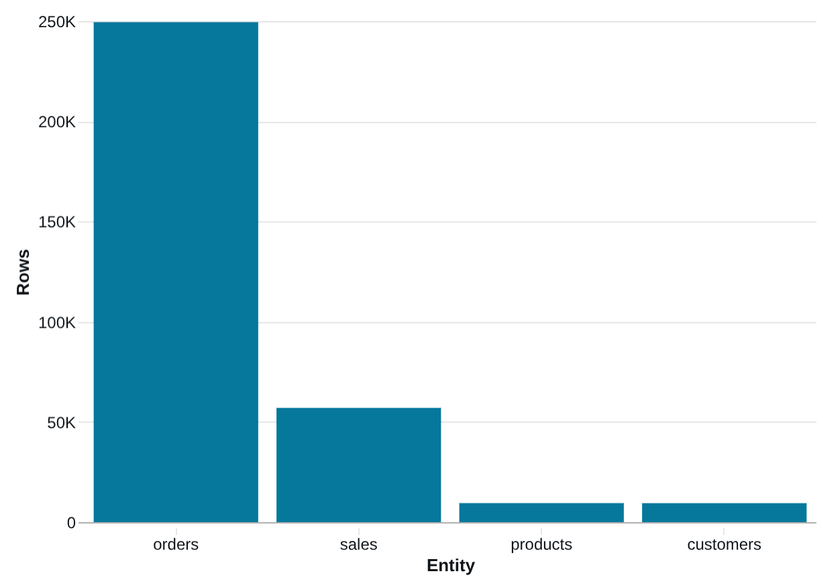

The reconciliation check fails the run unless these four add up to the Bronze count. Most order quarantines come from source rows whose ship date is before the order date.

Latest run by layer and entity

Rows and timing per entity

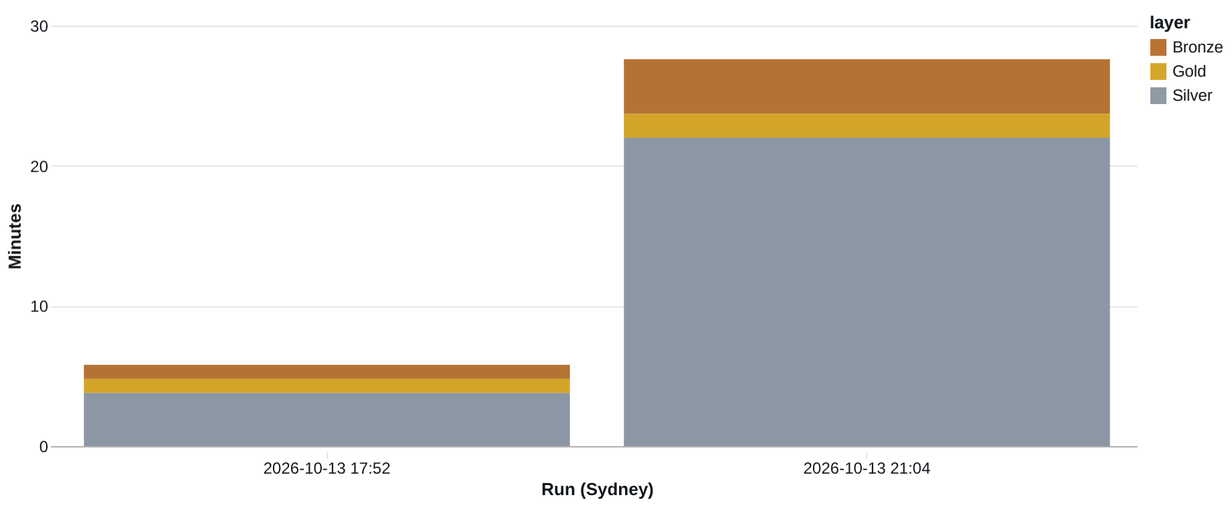

Layer	Entity	Rows in	Rows written	Quarantined	Duplicates	Seconds	Rows / sec
Bronze	customers	100,199,745	100,199,745	0	0	63	1,590,472
Bronze	orders	100,199,745	100,199,745	0	0	52	1,926,918
Bronze	products	100,199,745	100,199,745	0	0	41	2,443,896
Bronze	sales	100,199,745	100,199,745	0	0	55	1,821,813
Silver	customers	100,199,745	60,793	9,483	100,129,469	177	10,019,974
Silver	orders	100,199,745	47,508,751	249,493	52,441,501	628	878,945
Silver	products	100,199,745	2,062	9,510	100,188,173	142	10,019,974
Silver	sales	100,199,745	99,811,088	57,021	331,636	358	2,226,661
